

HLK 4600 CAMERA BOOM ARM

The HLK-4600 Camera Boom Arm has been designed for pipeline inspection work. Using a pair of these arms, pipelines up to 36" can be easily inspected. Its unique design allows the camera mount to stay at the same angle through the entire 120° of angular movement of the arm. The camera mount can be tilted through a 120°. The arm uses Hydro-Lek's standard HLK-1300 hydraulic cylinders.

Specifications

- Dimension:

Length	1350mm
Height	310mm
Width	120mm
- Movement Range:

Up/Down	70-0-50°
Left/Right	90-0-30°
Camera Tilt/Roll	60-0-60°
- Weight:

Weight in air	22kg
Weight in water	17kg
- Construction

	316 SS
	HE 30 Hard Anodised Aluminium
	Polyethylene
